

Flawless and harder than marble

Bette bathroom products are made of durable titanium-steel alloy and enamel. The material is thin and light yet extraordinarily durable. The glossy surfaces of BetteGlaze® are harder than marble, plastic or steel, but non-porous and resistant to abrasion and UV rays. Premium quality we guarantee for 30 years. We achieve the special evenness of our bathtubs, shower surfaces and wash tables using a wet-in-wet enamelling technique we've been perfecting for decades. The procedure permanently binds three ultra-thin layers of our special enamelling formula to the titanium steel carcass in two firing steps at 850° Celsius. The purely natural material created thereby unites the freedom of form granted by steel with the optical, haptic and hygienic properties of glass. Its enormous internal flexibility ensures the reliability and durability of Bette bath products.

* When installed by a professional plumbing company, we will grant an extended warranty of 30 years on our enamelled bathroom products, as stated in our warranty certificate.

Design is attitude

Bette views design as more than just design. We develop sensible architectural solutions with technical refinement and a high degree of aesthetic added value. Working closely with renowned designers, we constantly redefine the limits of steel moulding. Our particular passion is for intelligent ways to combine products and building shells. The symmetrical forms of Bette bathroom elements, rich in variety, give architects and bathroom designers the freedom to make individual needs a visually impressive and technically perfect reality.
